# Green Energy Groups

# Vision & Mission

## OUR VISION

Green Energy will contribute to mitigating woes of Climate Change by focusing on promoting alternate and renewable energy sources from Electric Vehicles (private and commercial), Solar for Electrical Purposes, Heat Pumps and solar for Agricultural Activities.

## OUR MISSION

Climate Change is a major global issue that can become alarming if no immediate action is taken, experts warn. Fossil fuels, largely used in vehicles of all hues from two-wheelers to massive cargo trucks, have contributed to the ecological crisis. Electric vehicles are seen as the panacea to reducing carbon footprints to save Planet Earth from the impending crisis. Green Energy is stepping into this niche segment to provide the most popular form of eco-friendly private as well as public transport. Green Energy Groups strongly promotes Alternate and Renewable sources of energy in the domestic (housing) and agricultural segments.

# RENEWABLE SERVICES

01

## SOLAR SERVICES

Rooftop solar panels  
Solar panels for  
Agricultural purposes

02

## ELECTRIC VEHICLES

Our goal is to make EV bikes a realistic and attractive option for riders of all backgrounds.

03

## HOUSING (Women's Empowerment)

To enable middle-class and economically backward class families of society to own affordable homes under the benefit of various Government and Non-Government/ Corporate funding schemes.

BETTER

# Solar Rooftop

The easy to instal rooftop panels will help utilize solar energy to power the electrical needs of homes.

Additional solar power, if generated, can be aligned to the general grid. This will result in saving traditional power and cost.
